This year Faith Communities Go Green (FCGG) evolved into a new collaboration between Green Umbrella and EquaSion. This collaboration unites two complimentary organizations to strengthen our work to make our world a better place. Green Umbrella is the premier sustainability organization in our region and EquaSion is the premier interfaith organization in our region. FCGG established itself as the bridge between faith communities and environmental sustainability enabling FCGG to support regional faith communities in their efforts to become better stewards of the earth.

Collaboration with both groups also supports our participation in the big events hosted and promoted by each organization. For example, our volunteers gave two in person presentations and hosted two facility tours for Green Umbrella’s largest annual event, the Midwest Regional Sustainability Summit. Our volunteers gave two virtual presentations for EquaSion’s largest annual event, the Festival of Faiths.

Our volunteers also worked at FCGG booths at both events as well as at a booth at the Cincinnati Earth Day Summit. The volunteers at the three booths provided education on the importance of faith communities' collaborative engagement in environmental issues, and sent 173 signed post cards to legislators about current Ohio environmental legislation.

One benefit of the new collaboration is the expanded audience we now reach. The combined audience of Green Umbrella, EquaSion, and FCGG exceeds ten thousand people. We needed a place to specifically address the unique intersection of faith and environmental sustainability not achieved alone be either Green Umbrella or EquaSion. As a result, we recognized the necessity for a website for faith communities to have access to relevant information about environmental sustainability.
Our top priority of 2022 was to create a new website, FCGG.org, that houses resources and enables communication between faith communities. The website provides EquaSion’s diverse religious communities with opportunities for environmental knowledge and action.

The website offers the following:

- News of current events, webinars, and alerts
- Education and possible actions concerning current legislation
- Information about our organization, mission, and vision statements
- Bios of our team of volunteer leaders
- Testimonial stories from faith communities
- Recordings of past FCGG webinars
- Monthly Eco-challenge suggestions
- Resources of media materials and grant options
- A student engagement forum
- Guidance on how to form green teams in congregations
- Calendar of events
- Book Club
- Field trip opportunities announcements
- Membership sign-up to grow our data base
- Survey to learn about the needs and achievements of regional faith communities
- The three working groups, Advocacy, Education/lifestyles, and Facilities
- A toolkit of resources

The toolkit brings together multiple resources, guidance, and sustainability actions that fit into the FCGG working groups found on working group pages on the website.
From April 11, 2022, when the website launched to this writing of August 10, 2022, the FCGG.org website received an average of 31.4 visits by unique visitors per day with an average of three different page hits per visit. Details found on Appendix #1 includes the top 10 pages visited by individuals and from the top 10 countries from April 11, 2022, to August 10, 2022.

The three working groups, Advocacy, Education/Lifestyles, and Facilities, create resources and programming. The new website has made their resources and program information easily accessible. Our target audience is members of the diverse regional faith communities. FCGG members have been working throughout the year on numerous initiatives. These include providing 3 in-person tours of places of worship that demonstrate good environmental stewardship, 9 zoom webinar presentations, 3 Ecochallenges, a FCGG book club, and the hosting of 3 booths at events put on by other organizations. The working groups leaders submit timely, information and resources on our FCGG Facebook group page, provides a fast way to communicate with the Faith Community.
The 2021-22 year was an active year for the Facilities Group; we sponsored a webinar, three facilities tours, and one of our members’ house of worship initiated a solar photovoltaic project.

**A Webinar to encourage recycling and reuse action in your congregation.**
Colleen McSwiggin hosted a webinar entitled “Learn about the Cincinnati Recycling and Reuse Hub”. The Cincinnati Recycling & Reuse Hub is a non-profit organization that is an outgrowth of her recycling work at Mount St. Joseph University.

**Tours of facilities showcasing good environmental stewardship.**
On May 22, Mt. Auburn Presbyterian Church (MAPC) hosted a talk and tour showcasing the work they have completed on their building over the last several years to bring it towards a net zero carbon footprint. Click here to learn more about the inspiring transformation of MAPC.

In conjunction with the Midwest Regional Sustainability Summit, the Facilities Group arranged tours of two facilities associated with faith communities: The Sisters of Charity and Christ the King Lutheran Church.

- **The Sisters of Charity** have constructed a new ministry facility that utilizes solar and geothermal technology to ensure the buildings will be Net-Zero Energy.
- **Christ the King Lutheran Church** in West Chester has focused on the transformation of their land to become an ecologically regenerative space that also helps feed the community and nurture social connection and spiritual growth.

**House of worship initiates solar photovoltaic project.**
St. Simon’s Episcopal Church, Lincoln Heights installed a solar photovoltaic system. For more information, please read the story in the Facilities Toolkit.
Our Education/Lifestyle Working Group has several subgroups in our Working Group that worked on educating and inspiring people to change their lifestyles to live with a minimal carbon footprint and contribute to the wellbeing of our planet.

These subgroups are:

- **Movie/Discussion**
- **Ecochallenge**
- **Webinars & Workshops**
- **Green Teams**
- **Greening & Gleaning**
- **Book-Club**
- **Eco Tips**
- **University Student Group**

**Movie and Discussion subgroup** – led by Becca Desai, offers movies that educate the public about climate action and sustainability issues.

This year we hosted two movies: *Kiss the Ground*, a movie that educates us on soil and its enormous capacity to help solve the climate crisis by sequestering carbon from the atmosphere using regenerative agriculture and farming. Based on this movie, we have prepared a [List of Tips](#).

*The Revolution Generation* explores how the next generations are taking control of the climate crisis and becoming a part of the solution.

The subgroup has compiled a list of [recommended movies](#).
The Ecochallenge subgroup - led by Fred Desai, invited people to participate in three Ecochallenges:

- The People’s Ecochallenge in the month of October
- The Earth Month Ecochallenge in the month of April, and
- The Plastic-Free Ecochallenge in the month of July.

The Webinars & Workshops subgroup - led by Susan Carlson and Susan Vogt, prepared a list of future webinars/speakers found in Appendix #2.

The Green Team subgroup - led by Sr. Caroljean "Cj" Willie, S.C., to ascertain the needs of faith communities and provide resources so they may become more environmentally sustainable.

Sr. Cj Willie organized and moderated a webinar panel on “How to Start a Green Team in Your Congregation” in November last year. Since then, a few faith communities have taken the lead to start a green team in their place of worship. “How to Start a Green Team” was improved and presented twice more, once for Green Umbrella’s Midwest Sustainability Summit, June 16, and again for the Festival of Faiths, July 31, 2022. Click here to view the two webinars.

The Greening & Gleaning subgroup - led by Mike Eck, has provided volunteer opportunities for gleaning to the community. For more information, please visit our website.

Becca Desai and Susan Fox worked with Mike Eck, Lyric Morris-Latchlaw, Jason Oden, and Sue Plummer, to organize a webinar on Sacred Grounds on May 16, 2022. The webinar focused on how to create and maintain beautiful, green, and environmentally sustainable grounds. For more information, please see the Tip-Sheet.
**EDUCATION/ LIFESTYLES WORKING GROUP**

**The Book Club subgroup** - led by Janet Steele, has met twice to discuss the books *Sacred Earth, Sacred Soul: Celtic Wisdom for Reawakening to What Our Souls Know and Healing the World* by John Philip Newell and *Braiding Sweetgrass: Indigenous Wisdom, Scientific Knowledge and the Teachings of Plants* by Robin Wall Kimmerer. For Book Club announcements please [click here](#).

**University Student group** - In February, college and university students from six regional universities, Cincinnati State, Miami University, Mount St. Joseph, Northern Kentucky University, University of Cincinnati, and Xavier University, participated in a panel presentation to discuss what they are doing to fight climate change.

Subsequently, there was a meeting to discuss next steps. This led to the formation of a new organization, Regional Intercollegiate Sustainability Council (RISC).

Here is their mission statement:

*Regional Intercollegiate Sustainability Council (RISC), an organization representing all the many local universities and colleges in the Greater Cincinnati region, is for students who want to create solutions through campus environmental sustainability projects. Students interested in this work are welcome and encouraged to join this group. For more information and to get involved, contact risc.sustainability@gmail.com and on Instagram @risc_sustainability.*

**Other Community Engagement** - Susan Fox, Joanne Gerson, Laurie Roche, and Pat Timm, Susan Vogt, and Sr. Cj Willie spoke at the Midwest Regional Sustainability Summit. Doug Bell, Joanne Gerson, Laurie Roche, John Talmadge, and Sr. Cj Willie spoke at the Festival of Faiths. Members from all three working groups volunteered at the FCGG booth to educate people about the opportunities to bring people from all faith communities together to protect the planet.
Mission:
The advocacy team works to inform the faith community of Cincinnati on legislation and other public policies that bear on environmental justice in the counties served by Green Umbrella. We brief our members on opportunities to apply their faith to advocacy and improve environmental conditions in our region, especially in carbon emissions and pollution.

Legislative highs and lows:
The Advocacy team has been principally focused on Ohio legislative initiatives with three goals:

- To win passage of HB 351 and repeal the HB 6 coal plant subsidies which prop up two aging, polluting plants at a cost of $85 million a year to Ohio ratepayers
- To track and engage citizens in Ohio’s redistricting process, unfolding for the first time under anti-gerrymandering rules approved by over 70% of Ohio voters in referenda in 2015 and 2018
- To win passage of HB 450 to authorize community solar projects for the first time in Ohio, a bill particularly focused on rehabilitating brownfields in Appalachian Ohio. This would be a huge leap forward in lower-income people’s access to clean, affordable electricity.

We organized letter-writing opportunities for Earth Day, the Midwest Sustainability Summit, and the Festival of Faiths on HB 351 and HB 450, and emailed postcard templates to interested congregations. We showed people how to use their smart phones to find out who represents them in the Ohio Legislature and provided a list of SW Ohio legislators so voters could hand-address their postcards. We mailed 173 postcards for passersby, many of whom were delighted to find a faith-based group advocating for solutions to climate change.
Neither HB 351 nor HB 450 has passed out of committee, though HB 450 and HB 351 have majority party sponsors and sufficient hearings to be voted out of committee subject to majority party leadership approval. This is part of the ongoing culture of impunity with which the current supermajority in the Ohio Legislature has disregarded the pleas of voters against HB 6 and in favor of clean energy and energy justice. The same impunity applies to the redistricting process, in which the majority party leadership defied multiple Ohio Supreme Court decisions finding four successive state legislative maps and two Congressional maps unconstitutional for disproportionately favoring the majority party. Jane Mayer’s article “State Legislatures are Torching Democracy” in The New Yorker exposes Ohio as an egregious example of gerrymandering undermining democratic institutions and key policies supported by the majority of our voters. The Advocacy team is discussing a summit for this fall to inform people about the trends she describes and actions we can take to restore it. Please see this powerful Call from American Quakers, shared by Deborah Jordan, for a clear roadmap.

On Aug. 7, at the Festival of Faiths, we handed out a flyer explaining the climate and environmental justice elements of the Inflation Reduction Act and invited people to contact their legislators. The Inflation Reduction Act of 2022 represents the most significant Congressional commitment in 50 years to reducing American carbon emissions. President Biden signed it into law on August 16, 2022.

**Briefing FCGG congregations:**
We organize monthly Zoom meetings with a wide variety of faith communities. The events organized by other FCGG teams generated many new names for our mailing list. We have paid close attention to policy analysis from the Ohio Environmental Council and share their updates with our members. Members of our group now post regularly on the FCGG Facebook page.
We email people who have expressed an interest in advocacy about legislation, but also about many exciting regional developments which open opportunities for productive and inspiring civic engagement. These include:

- Community input opportunities to help update of the Green Cincinnatti Plan, at the invitation of the City of Cincinnatti’s Office of Environment and Sustainability
- Green Umbrella’s new Regional Climate Collaborative launched in July 2021, coordinated by Savannah Sullivan

**Toolkit:**
We compiled an [advocacy toolkit](#) for the FCGG website, including OEC’s advocacy handbook and how to sign up for Innovation Ohio’s “Daily News Clips” email to access reporting from major Ohio and national news outlets.

**Next steps:**
1. Monitor the implementation of the environmental policies in the Inflation Reduction and Infrastructure bills, alert FCGG members to opportunities to ensure these are implemented to enhance environmental benefit and justice, and to equip them to inform the communities they serve about how to access these benefits.
2. Collaborate with [EquaSion](#) on these efforts and with the Archdiocese of Cincinnati’s commitment to initiate Pope Francis’ Laudato Si Action Platform to expand the strength and potential of our interfaith efforts.
3. Perform advocacy for HB 351, HB 450, and other Ohio environmental legislation that may gain traction during the lame duck session at the end of this current legislative session.
4. Monitor the new Ohio legislative session beginning in 2023 to advocate for new environmental legislation introduced for passage.
LOOKING AHEAD

In 2021 FCGG put together a survey to better understand the needs of each congregation to better serve the faith community. The seven-question survey at https://fcgg.org/survey/ provided some ideas for our working group topics that are of interest to people in our database. For more information about the survey, and its results, please see Appendix #3 and #4.

Looking ahead to 2023, we will leverage our website’s robust resources to pivot our focus to encourage the development of Green Teams within faith communities. The FCGG working group programs can inspire Green Teams to achieve measurable results. In every faith community, there are people passionate about our planet’s health and its effect on their children, grandchildren and beyond. Faith Communities that pull these motivated individuals together to form a Green Team, quickly achieve environmentally best practices within their houses of worship. We are here to help every interested faith community form its Green Team. Green Team members work with FCGG sharing their knowledge and providing guidance to others. They, in turn, learn from the vast knowledge of our diverse faith communities. We do best when we work together, to find the courage and the will, to make the morally right choices to do what we know is necessary to protect our natural world for generations. The survey was also used to create a list of Houses of Worship that have completed the survey (Appendix #5) and includes the Houses of Worship with green teams (Appendix #6).
Please note** These stats are only for **4 months**, not the 365 days indicated.

**Visitors** is the number of unique users that have visited the site.

**Visits** is the number of page-hits your site has received.

Creators: Cooper, Anne and Carrie Resnick

Carrie Resnick is a full-time mother with a BFA in Industrial Design. She is passionate about the living world, preserving it for future generations and re-cultivating wonder and awe of all creatures. She is member of the Climate Change Team of the Social Action and Social Justice Committee of her congregation.

Anne Cooper is a former teacher and full-time mom of two, with a B.A. from Miami University and M.A. from the University of Michigan. Currently she chairs the Climate Change Team of the Social Action and Social Justice Committee of her congregation and is dedicated to passing on love of nature and a sense of shared responsibility for our planet’s future to the next generation.

Leader: Gerson, Joanne

Joanne Gerson, Founder, Co-chair of Faith Community Go Green, created and directed educational programs including Kinder-Zoo, Cincinnati Zoo’s first preschool program, and The Super Saturday Program, an enrichment program for gifted children. She founded the Rockdale Temple Environmental Committee, Southwest Ohio NO Frack Forum, and Shomrei Olam – Jewish Environmental Advocates. She served as Montgomery Planning Commissioner leading the revisions of Montgomery Storm Water and Lighting Zoning Codes, and as Program Committee Chair for Hamilton County Regional Planning Partnership leading the effort to change environmental zoning codes in the county.

37 RELIGIONS AND DENOMINATIONS REPRESENTED BY OUR MEMBERS

19 GREEN TEAMS
To complete the survey in numbers 2 through 5, individuals checked the boxes that apply. They had the option to add comments following each list of boxes. Answers to questions 2 through 5 that show a response of 1 or 2%, reflect that the individual completing the survey added their personal comments into the comment box. All their comments are included in the summary as indicated by a 1 or 2%. Question number 7 includes a space to provide the contact information for their green team leader. That list is separate.
